Ahmed Magdy Selim

FRONTEND DEVELOPER

Cairo,Egypt | 01090319818 | ahmedsilem.dev@gmail.com | LinkedIn | GitHub | Portfolio

Summary

I am a Front-End Developer dedicated to building fast, scalable, and user-centric web applications. My expertise lies in the React ecosystem, where I leverage Next.js to create seamless, SEO-friendly experiences that don't compromise on performance.

Skills

Frontend: HTML5, CSS3, JavaScript, TypeScript, Tailwind CSS, React.js, Next.js

Tools & Libs: TanStack Query, RESTful APIs, Context API, Bootstrap, jQuery, Git, GitHub, Redux Toolkit

Education & Training

Helwan University **2019 - 2023**

Bachelor's degree, Management information systems (MIS)

Front-End Development Trainee **Sep 2025 – May 2026**

Route Academy | Certificate **Cairo, Egypt**

- Completed an intensive Front-End Development Diploma covering modern web development technologies.
- Built 3+ responsive web applications using React.js, Next.js, TypeScript, and Tailwind CSS.
- Integrated 10+ REST API endpoints for authentication, products, and user management.

Experience

Frontend Developer | Freelance **2025 - Present**

Built 3 production apps using React.js, Next.js, TypeScript, deployed on Vercel

Projects

E-Commerce | Frontend Web App

- **Tech Stack:** Tech Stack: Next.js 14, TypeScript, NextAuth.js, Tailwind CSS, JWT-Decode, RESTful APIs, Vercel.
- Developed a responsive e-commerce frontend using Next.js 14 and TypeScript with full integration for products, cart, and user management via external REST APIs.
- Implemented secure authentication using NextAuth.js Credentials Provider with JWT strategy and custom session handling for persistent user login.
- Built a clean, mobile-first UI with Tailwind CSS, leveraging Next.js Server Components for performance optimization and deployed on Vercel

Social Hub| Frontend Web App

- **Tech Stack:** React.js, React Query (TanStack Query), Tailwind CSS, Context API / RESTful APIs, Lucide Icons.
- **Dynamic Feed & Query Management:** Developed a responsive social media platform featuring real-time feed updates, profile management, and post interactions using **React Query** for efficient client-side caching and state synchronization.
- **Optimistic UI Updates & Error Handling:** Implemented robust mutation handling (onSuccess, onError) using **React Toastify** to provide instant feedback for user actions like post creation and updates.
- **Modern UI/UX Design:** Crafted a clean, mobile-responsive user interface using **Tailwind CSS**, including customizable cover photo uploads, user profile statistics, and interactive tabs for user posts and saved content.
- **State & Ref Management:** Leveraged React Hooks (useState, useRef) for seamless file upload handling, preview generation, and form resetting, ensuring zero UI crashes on incomplete uploads.
